Strategy Fee (ex. VAT): Management Fee - (B1) 0.86%; (C) 1.04% (Incl. VAT)
Performance Fee - 0%

Benchmark: Asisa Multi Assets High Equity Average

Investment Objective

The Fibonacci BCI Temperate Fund investment objective is to provide investors with capital growth whilst maintaining a moderate level of income. The emphasis is more on capital growth rather than on capital preservation.

Investment Policy

The portfolio maintains a cautious to moderate risk profile and its equity exposure ranges between 20% and 40% of its net asset value, whilst its property exposure ranges between 10% and 25% of its net asset value. In order to achieve its objective, the investments normally to be included in the portfolio may comprise a combination of assets in liquid form, money market instruments, interest bearing securities, bonds, debentures, corporate debt, equity securities, other interest-bearing securities, property securities, preference shares, convertible equities and non-equity securities.

The manager may invest in participatory interests or any other form of participation in portfolios of collective investment schemes. The portfolio may from time to time invest in listed and unlisted financial instruments, in accordance with the provisions of the Act.

Investment Policy

Low	Low-Medium	Medium	Med-High	High
-----	------------	--------	----------	------

Where the asset allocation contained in this MDD reflects offshore and equity exposure, the portfolio is exposed to currency and equity risks.

- The portfolio is exposed to default and interest rate risks.
- Therefore, it is suitable for medium term investment horizons.
- The expected potential long-term investment returns are lower but less volatile over the medium to long term than higher risk portfolios.

Fibonacci Temperate Fund

Strategy Risk

Certain investments:

Including those involving futures, options, equity swaps, and other derivatives may give rise to substantial risk and might not be suitable for all investors. Where foreign securities are included in the portfolio there may be additional risks such as potential constraints on liquidity and repatriation of funds, macroeconomic risk, political risk, foreign exchange risk, tax risk, settlement risk as well as potential limitations on the availability of market information.

Net Asset Value (NAV):

Means net asset value, which is the total market value of all assets in a portfolio including any income accruals and less and deductible expenses such as audit fees, brokerage and service fees.

Annualised Return:

Is the weighted average compound growth rate over the performance period measured.

Highest & Lowest Monthly Return:

The highest and lowest rolling twelve-month performance of the portfolio since inception.

Standard Deviation:

The deviation of the return of the portfolio relative to its average.

Draw-down:

The greatest peak to trough loss until a new peak is reached.

MTD:

Month to date return.
